REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Appellants arguments that none of the references of record, either singly or in combination, inherently discloses or suggests that a threshold voltage of a second device varies about 200 millivolts to about 400 millivolts from a threshold voltage of a first device, as required by claim 1, are persuasive

Appellants assert persuasively that the claimed range is clearly not an inherent characteristic of Wang. The threshold voltage of the device in region 2 of Fig. 7 of Wang does not necessarily vary about 200 millivolts to about 400 millivolts from the threshold voltage of the device in region 1 of Wang.

Appellants further persuasively aver that a general disclosure that the material in a gate affects the threshold voltage of a device cannot be fairly construed to suggest that the claimed threshold voltage of a second device varies about 200 mllivolts to about 400 millivolts from a threshold voltage of a first device formed on the same semiconductor device, as required by claim 1. *In re Deuel*, 51 F.3d 1552, 34 USPQ2d 1210 (Fed. Cir. 1995).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
